

European Utility Week is now **Enlit Europe!**

The success of the energy transition depends not on competition, but collaboration, and **Enlit Europe** offers you unrivalled access to the industry's decision-makers, investors and innovators, not to mention the next generation of energy entrepreneurs.

Why Exhibit?

With a rich heritage in the energy sector, Italy is a front-runner in Europe's energy transition.

Italy is the **4th** most energy consuming countries in Europe.

18.036 storage systems are built in Italy now, has an installed capacity of **80 MW** from renewable energy sources.

It is predicted that **24%** of energy efficiency will be achieved in the country as of 2020.

Italian government plans to increase its **20 GW** installed capacity up to **50 GW** by 2030.

Exhibitor Profile

- Energy Traders
- Regulators
- Policymakers
- Independent Power Producers
- Investors
- Commercial and industrial Energy Consumers
- Energy Generation
- Transmission and Distribution
- Smart Energy Systems
- Network Operators
- Service Providers
- System Integrators
- Technology Suppliers
- Government Energy Departments
- Energy IoT
- Energy Storage
- Energy Efficiency
- Renewable Energy
- Public Services
- Start-Ups

Visitor Profile

- Public Institutions and Organizations
- Investors
- Suppliers and Consumers
- Energy Consulting Services
- Energy Cooperatives
- IT and Software Companies
- Smart City and Building Engineers
- Renewable Energy Companies
- Grid Operators
- Logistics Companies
- Academicians
